Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 May 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 63-001032 issued to Yasutake et al. Yasutake discloses a method of forming patterns using an electron beam. Yasutake discloses an exposure map creating means, correcting means, and judging means. Specifically, Yasutake discloses an exposure map creating method, based on positional data and irradiation data. Yasutake, also, describes the judging means, which allows the determination of any straddling or overlapping section (see line 4 of upper left column to line 5 of upper left column of page 4 of his disclosure). Further, Yasutake discloses performing a proximity correction based on calculating exposure quantity (in other words, pattern density) of the pattern forming area.

3. As per claim 2, positional relations between coordinates of edge points of the mesh boundaries and shot coordinates, including information of the pattern laying over the boundary.

4. As per claim 3, Yasutake discloses the addition of the overlapping section (see figure 1).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yasutake. Yasutake discloses the claimed invention, except for the limitation N*M memories for accommodating either area values or area densities of shots. It is held that Yasutake's teaching of sub-field division is sufficient to motivate an ordinary artisan to impose his/her own criterion for defining said sub-field. Moreover, applicant has failed to demonstrate adequately the criticality of N*M modification. Applicant, rather, recites N*M as means for memory accommodation, which Yasutake's invention is equipped to perform using his pattern generator (10).

7. Therefore, it is held that the claimed invention is an obvious variant of Yasutake's invention and the motivation to modify Yasutake's invention would have been obvious at the time this invention was made, since Yasutake's sub-field division.

Response to Arguments

8. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.
